Question	A	B	C	D
Blank lines are _____ type of REXX instruction.	Keyword	Null	TSO commands	Formatting
CLIST statement 'READ' falls under _____ category.	Control	Assignment	Conditional	None of these
The ALTLIB command offers several functions, which you specify using the following operands:	ACTIVATE	DEACTIVATE	DISPLAY	SET

What output will be displayed after running the following code?
 	
DO count = 1 TO 10 BY 5
    count = count + 2
  CTR = 5 * 5
    CTR = CTR + 1
END
SAY 'Count ' count
	Count 15	Count 11	Count 12	It will give syntactical error

What will be the output of following REXX instruction? SAY 'This isn"t my book'	It will give syntactical error	THIS ISN'T MY BOOK	THIS ISNT MY BOOK	This isn't my book
In REXX, to receive input from the screen/terminal, we use the command:	READ	PULL	ACCEPT	RECEIVE
What will be the output of following REXX instruction? SAY 'This isn't a Cobol instruction.'	It will give a syntactical error	THIS ISN'T A COBOL INSTRUCTION	THIS ISNT A COBOL INSTRUCTION	THIS ISN"T A COBOL INSTRUCTION
In REXX, I want to assign the variable DAY with a value of '01', the variable MONTH with a value of 'January' and the variable YEAR with a value of '2009'. Identify the valid formats to read the data '01 January 2009' from the user.	PARSE PULL DAY MONTH YEAR	PULL DATE PARSE VALUE DATE DAY MONTH YEAR	PULL DATE PARSE VALUE DATE WITH DAY MONTH YEAR	PULL DATE PARSE VALUE DATE WITH DAY MONTH

Question	Option A	Option B	Option C	Option D
Consider the following: name = 'John' number1 = number2 number2 = 5 Which of the following REXX expressions will generate an error?	10 / number1	name || 'number2'	number2 * 3	name > number2
Identify the statements which are not correct in REXX programming:	A REXX clause must be enclosed in 'Quotes'	Multiple instructions can be coded on single line, as long as they are separated by a ';'	A REXX program should start with a comment clause /* REXX */	Continuation of REXX instructions is achieved by using a ',' as a continuation indicator
To execute a CLIST code implicitly, the program name can be preceded by _____.	&	*	%	#
Identify the valid continuation symbol used in CLIST programs.	-	*	$	C
Identify the valid comment statements within a CLIST code.	alloc file(in) data(accounts.data) shr /* Input data set	/* Input data set alloc file(in) data(accounts.data) shr	/* Input data set */ alloc file(in) data(accounts.data) shr	/* SAMPLE PROGRAM */

Question	Option A	Option B	Option C	Option D

Refer to the CLIST code:
 	
PROC 1 LANGUAGE
  IF &LANGUAGE = SPANISH THEN +
    WRITE HOLA, MUNDO
  ELSE IF &LANGUAGE = FRENCH THEN +
    WRITE BONJOUR, MONDE
  ELSE +
    WRITE HELLO, WORLD
EXIT
 	
What would be the output of the above mentioned code, when the input is given as "ENGLIGH".
	HOLA, MUNDO	BONJOUR, MONDE	**HELLO, WORLD**	This code would throw an error

A CLIST which invokes another CLIST is called as:	Function	Sub routine	**Nested CLIST**	Procedures
What would be the value of J, when the below REXX EXEC is executed? /* REXX */ J = 1 DO UNTIL J < 10 J = J + 1 END SAY 'J IS ' J EXIT	**2**	9	10	1
Refer to the below code & identify as what would be the result? /* REXX */ SAY 'HI'; SAY 'HELLO' ; EXIT	**HI HELLO**	HI;HELLO;	hi hello	Hi Hello

Refer to the code below:	LOOP... 1	LOOP... 1	LOOP... 1	LOOP... 1
	LOOP... 3	LOOP... 2	LOOP... 2	LOOP... 3
/* REXX */	LOOP... 5	LOOP... 3	LOOP... 3	LOOP... 5
DO NUMBER=1 TO 5 BY 2	CAME OUT OF THE LOOP	LOOP... 4	LOOP... 4	CAME OUT OF THE LOOP
SAY 'LOOP... ' NUMBER	COS NO REACHED: 7	LOOP... 5	CAME OUT OF THE	COS NO REACHED: 5
END		CAME OUT OF THE	LOOP COS NO	
SAY 'CAME OUT OF THE LOOP COS NO REACHED: ' NUMBER		LOOP COS NO	REACHED: 5	
EXIT		REACHED: 6		
What would the output from the above code?
